Xi'an Jiaotong-Liverpool University
西交利物浦大學

Module Code: CHE105
Module Title: Introductory Organic Chemistry
Semester 1, 2023/24 Year 2

RESIT EXAMINATIONS

Duration: 2 hours

Module Examiner: Dr. E.Amigues **Department: Chem. Tel: 0512 8816 7123**

Instructions to Candidates:

1. Answer all questions.

2. The maximum mark is 100.

3. You can answer the questions in any order you prefer, e.g. start from Q4.

4. Answers should be written on the Answer Booklet provided; the left-hand page of the Answer Booklet can be used for drafting work when necessary.

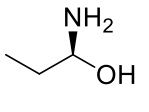

5. Answers should be written using pen, black or blue, **NO PENCIL**.

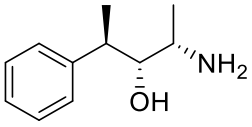

6. Only solutions written in English are accepted.

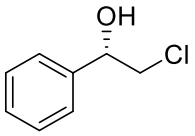

Question 1 (20 marks)

Assign the configuration (*R* or *S*) to each stereocentre in the molecules shown below. Clearly show how you have worked out your answer. (10 marks for the assignment, 10 marks for the justification).

Show the CIP priority rules for every single stereocenter

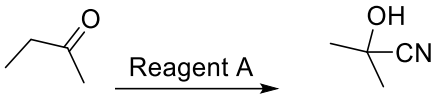

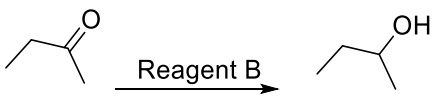

Question 2 (10 marks)

Propose suitable reagents and provide plausible mechanisms for the formation of compounds **2** and **4** (5 marks for each reaction, 2 for the reagents, 3 for the mechanism).

1 **2**

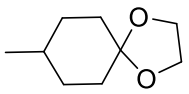

3 **4**

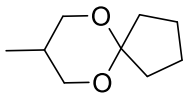

Answer:

Question 3 (10 marks)

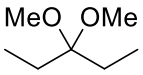

Suggest a combination of a carbonyl compound and an alcohol to produce each of acetals **1** to **4**.

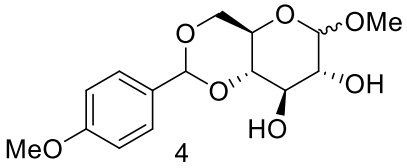

1

2

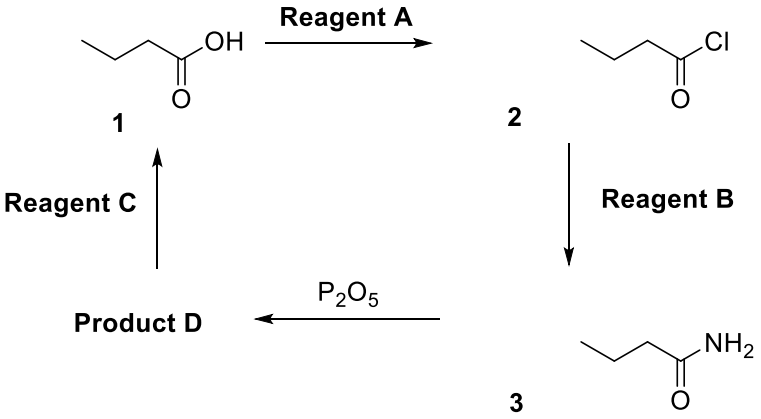

3

4

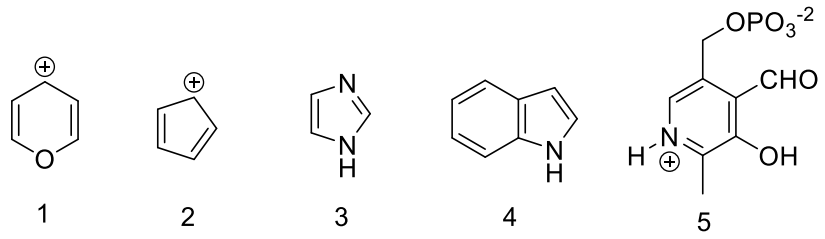

Question 4 (10 marks)

Identify the reagents **A, B, C** and the product **D**. No mechanisms required. (2.5 marks each)

Question 5 (10 marks)

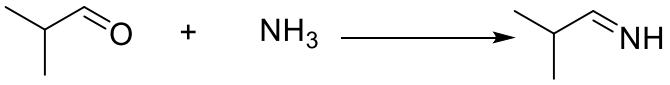

Which structural features does a compound need to have in order to be aromatic? (5 marks) Which of the following compounds are aromatic? Fully justify your answer. (5 compounds, 1 mark each).

1 2 3 4 5

Question 6 (20 marks)

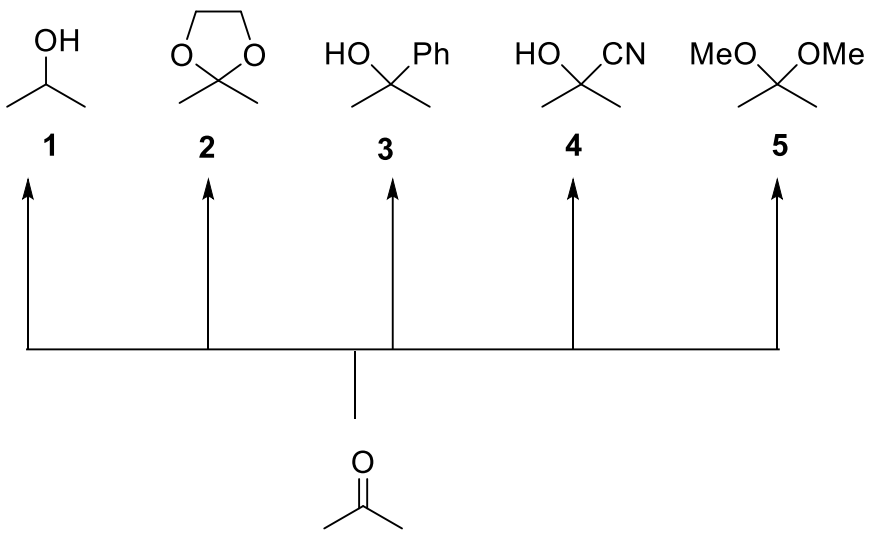

Suggest mechanisms for the reactions that lead to the formation of product **A**. (20 marks)

A

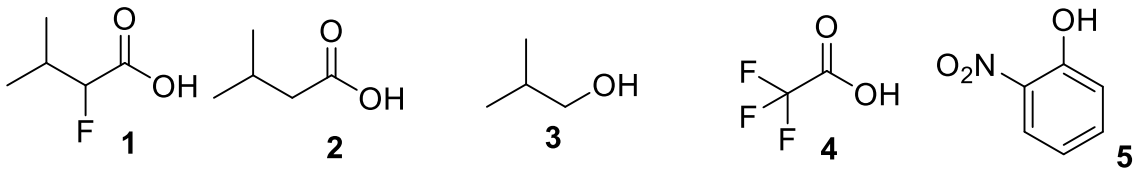

Question 7 (10 marks)

Identify suitable reagents to convert acetone into **1**, **2**, **3, 4** and **5**. No mechanisms required. (2 marks each).

Question 8 (10 marks)

Rank compounds **1** to **5** in order of increasing acidity. Explain your answers.

The End of the Paper
